

## OBSTETRIC ANAESTHESIA FELLOWSHIP REGISTRY

**Hospital:** St George's Hospital  
**Road:** Blackshaw Road  
**City:** Tooting  
**State:** London  
**Postcode:** SW17 0QT

**Supervisor:** Dr Emma Evans  
**Telephone:** 0208 725 0051  
**Email:** [Emma.Evans@stgeorges.nhs.uk](mailto:Emma.Evans@stgeorges.nhs.uk)

**Enquiries:** Dr Emma Evans, Dr Tony Addei  
Ivy Hagan, Administrator, St George's School of Anaesthesia

**Telephone:** 0208 725 0018

**Application form:** via email to contacts above

**Duration:** 6 months (Feb/Aug)

**Grade:** Post fellowship SpR 3 / 4 / 5 or ST 5 / 6 / 7 Full or Part time slot share

**General:** This post is designed for anaesthetists with an interest in developing obstetrics as an ongoing career aim and provides opportunity to work at a senior level in a busy high-risk obstetric unit.

Experience gained in:

**Risk management:** regular attendances at obstetric risk management and SUI meetings.

**Teaching:** experience in multi-disciplinary education is possible through St Georges GAPS simulation centre, ward based simulation skills & drills and involvement in our midwifery mandatory training programme.

**High-risk patient management:** there are weekly high-risk clinic run by Cardiac Anaesthetists, as well as multi-disciplinary Maternal Medicine clinics and excellent daily teaching Obstetric ward rounds.

**Audit:** St George's is a well-established audit unit, with the expectation you will produce a major audit or research project during your placement. Previous fellows have successfully submitted work for presentation at major meetings.

**Clinical:** The average Obstetric Anaesthesia workload is 3 sessions per week. There is daily labour ward cover with morning elective LSCS list and all day emergency theatre cover. Consultant sessions x 2 in morning and x1 all day. 1 in 8 senior anaesthetist on call rota- covering labour ward and senior anaesthetic cover for the hospital (area can be negotiated with the School).

**Hospital:** St George's is a large London teaching hospital and a modern tertiary referral centre with >5000 deliveries/year. The Obstetric Unit comprises both low-risk midwifery and consultant led units, an Obstetric HDU and well regarded Fetal Medicine Unit. We receive South West Thames referrals for high-risk pregnancies, including developing expertise in cardiac surgery in pregnancy. There are 10 Consultant Obstetric Anaesthetists, with subspecialty expertise in Cardiac Anaesthesia, Education/Simulation, Ethics/Law and Head & Neck Anaesthesia.
